

“Using the 360° Walk Around Circle for Safety saved my son’s life”

An actual letter: I’m writing this letter to express my sincere gratitude for this process because it helped to avert a potential family tragedy.

On Saturday, July 14, 2001 I was in a hurry and needed to run a few errands before the start of my favorite TV show. I thought all three of my younger children were upstairs playing in their rooms and paid no attention to their whereabouts as I opened the door to my car that was parked in the driveway. I was in such a rush, that I forgot to do my normal 360° walk around.

With the car started and ready to go, I had second thoughts and got out to take a look behind the car. I saw nothing. On my way back, I heard my four-year old son say, “I can’t get the bug.” The sound appeared to come from under my car. I bent down and took a look, and there was my son trying to squeeze his little body under the rear axel to reach a bug that was under the car. Had I backed-up, I most certainly would have injured or possibly killed my son.

Needless to say, I am very grateful for this process and the training that I have received and the constant reminders of hazards at work and in our daily lives. I credit this training for triggering my second thoughts that resulted in my eventual walk around, probably saving my son’s life. From now on, I will faithfully conduct my walk around and also look underneath to see if there are any unseen hazards.

I would have sent this letter earlier, but the swelling in my eyes just went down enough for me to see. It’s amazing what a mother will do when she finds out that she almost ran over her only son!

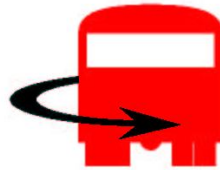

Think about this...

Last year 60 children were killed in their own driveways by their own parents!

Make it a daily habit... Take the 30 seconds to do the 360° Walk Around Circle for Safety

- Vehicles can be fixed, a life can not
- Practice 360° Walk Around Circle for Safety at home and at work
- Eliminate the potential for injury, death, and/or damage to vehicle or work record

360° Walk Around Circle for Safety

What is the 360° Walk Around Circle for Safety?

Simply put, it is the process of completely walking around your vehicle just prior to moving it.

It involves looking for hazards such as: a vehicle parked behind, in front of, or on the side of your vehicle. It also is to be certain that there is not a child playing near or under your vehicle.

It can protect you or someone you love.

360° Walk Around Circle for Safety

The order in which you do things can change the desired outcome...

Why?? Because with time, circumstances around you are always changing.

A 360° Walk Around Circle for Safety should always be performed just prior to moving the vehicle.

It only takes 30-seconds...but is worth your time in order to prevent a tragedy.
